Projects

E-Mina – Pop Culture Tourism App, github.com/YACT-jp/E-Mina-mobile-frontend

Mobile application for searching and sharing real-life locations from Japanese pop culture

- Led frontend development effort for key features using **React Native** framework for Android
- Researched & integrated mobile feature libraries such as **React Navigation**, **React Native Maps**
- Leveraged **NativeBase framework** for rapid-prototyping of component UI, feature functionality
- Facilitated communication with backend engineers regarding API endpoints, database structure
- Implemented user authentication and account creation using **MongoDB Realm** cloud services

Festival Finder – Interactive Map, github.com/Gabe-Goodman/Festival-Finder

Responsive web application guiding users to participating shops for community events

- Designed feature-rich, full stack SPA in **React** using modular components, **Firebase**, **Maps API**
- Deployed full stack application using **Firebase Hosting**, continuous deployment using **Netlify**
- Executed preliminary user testing, relayed results to stakeholders during informal meetings

My Media Library – Personal API, github.com/Gabe-Goodman/My-Media-Library

Media API executed using Express, Node.js, PostgreSQL, Knex.js

- Engineered a **RESTful API** server in **Express** and **Node.js**, providing CRUD functionality
- Interfaced with **PostgreSQL** database using **Knex.js** for JavaScript query-building
- Conducted unit testing using **Mocha framework** with **Chai** assertion library
